

every single day

please take me by the hand
show me places that exist
show me that you are my friend
give me what i have missed

don't want this seek and hide
with the sadness in my eye
i want to step beside
every single day

it is not the endless wisdom
that i want to reach
it is like a useless blister
i now i have to leach

i want to stop the pain
that burns the thoughts away
will dancing in the rain
every single day

i want sunshine
i want smilings
i want shoeshine
i want right of silence

want to read - pray the creed - sing a song - say so long - want a laughter -
son daughter - want a wife - rest of life - a good job - being top - house with
garden - never pardon - be a hero - win with zero - say goodbye - live and die
- won't forget - a warm bed - this whole list - i won't miss - every day - every
day

i reach out with my left arm
someone hold me tight
desiring bodily warmth
the reason for my fight

give me the lust for life
give me colors kill the gray
take me to your hive
every single day
